Subject :- Extension of the Scheme for the Resuscitation of Sugarcane Growers' Co-operative Societies in Hospet Sugar Factory area

Sir,

With reference to your letter No. 114524 P & D I/51-6, dated the 31st December, 1951, I am directed to say that as the Madras Government have expressed their inability to meet the expenditure in connection with the work regarding the revival of the Sugarcane Growers' Cooperative Societies from within the grant of Rs. 5,62,000/- allotted for the 5-year Scheme for the Development of Sugarcane Industry in Madras, it is regretted that the Indian Central Sugarcane Committee is not in a position to meet any expenditure in connection with the above mentioned scheme from any other source.

Yours faithfully,

--

I submit that in view of the revival of 4 posts of typists, the anticipated savings under the scheme will be minimised. In the scheme originally sanctioned the rate of lease amount sanctioned was only Rs.300/- per acre per annum. But in respect of Kulitalai Liason Farm, the lease amount had to be paid at the rate of Rs.375/- per acre per annum for February 51 planting and at the rate of Rs.425/- for July '51 and February 52 planting. Further, it is proposed to compulsorily lease land for the Liason Farm at Hospet and the rate quoted is Rs.500/- per acre. During 1952-53 season, the lease rent in respect of Kulitalai farm will have to be paid at the increased rate and it is not known whether there will be a demand for further increased rent. In view of all these, it is not possible to correctly gauge the exact amount of sowings out of the sanctioned grant for the scheme up to 31-3-1953. However, on a general consideration of the position as is now known, a sum of Rs.8,000/- is the anticipated saving at the end of 4 year period.

Sd/.K.C.Naik,

--:--

In their order cited, Government sanctioned the continuance for a period of six months from 29-10-1951 of a Senior Inspector to attend to the work connected with the revival of Sugarcane growers' Cooperative Societies in Hospet area. In this connection I submit that the Deputy Registrar, Bellary withdrew the post of Senior Inspector on 28-10-1951 A.N. The Senior Inspector was reappointed on 31-1-1952 F.N. I therefore request that Government may be pleased to sanction the continuance of the post of Senior Inspector from 31-1-1952 F.N. for a period of 6 months.

In para 2 of their order cited, Government asked me to submit a scheme for work in Co-ordination with the sugarcane development staff of the Agricultural Department. I submit herewith a copy of the scheme submitted by the Deputy Registrar, Bellary together with the suggestions of the sugarcane Liaison Officer, Hospet. I request that necessary sanction may be obtained from the Indian Central Sugarcane committee for the continuance of the existing post of Senior Inspector and also for the employment of an additional Junior Inspector of Cooperative Societies for a period of one year.

To A.S.

A draft memo. note is submitted below for ... approval. Since received.

Draft Scheme for the Development of Sugarcane growers' Cooperative Societies in Hospet Sugar Factory Area.

The Inspectors (Senior Inspector and Junior Inspector) will coordinate the working of the societies selected for developing Sugarcane industry. They will continue to be under the control of the Deputy Registrar who will review their work and give suitable instructions from time to time, as was the case in the last cane season. The societies noted below in whose area the members grow cane which is used for the Hospet India Sugars & Refineries Factory will be continued for working the scheme:-

(1) Hospet Agricultural Coop. Society,
(2) Hospet Sugarcane Growers' Co-op. Society,
(3) Chitwadigi C.S.,
(4) Kamalapuram C.S.

The following societies which were proposed to be brought under the scheme in the last season and which did not work the scheme will also be included under the scheme during this season:-

(1) Nagenahalli C.S.,
(2) Malpanahalli C.S.,
(3) Anantasayanagudi C.S.

Thus 7 societies whose members grow sugarcane will be attached to the sugar factory.

Stage I:- February '52 to April '52 (The post was filled up only on 31-1-52 F.N. and hence programmed from 1-2-52 only):-

(1) Collection of data from villages and fixing of tagget for the extent of cane growing land for each village and the acreage that may be brought under the scheme by the members of the 7 societies. On the basis of the data gathered last year and the working of the scheme in the last season, a target of 1650 acres (approximately) is fixed to be registered for supply of cane to the factory by the members of the 7 societies as per details below:-

Name of Society.	Acreage.
(1) Hospet Sugarcane Growers' C.S.	400
(2) Hospet Agricultural C.S.	400
(3) Chitwadigi C.S.	200
(4) Kamalapuram C.S.	300
(5) Nagenahalli C.S.	150
(6) Malpanagudi C.S.	150
(7) Anantasayanagudi C.S.	50
Total	1650

(2) Preparation of loan applications for the societies, submitting them to the Hospet Co-op. Central Bank, getting them sanctioned and seeing to the disbursement at the proper time.

(3) Collection of particulars regarding the requirements of iron and steel implements, chemical and other manures etc., for the societies for supply to the cane growing members.

(4) Inspection of fields of members to see to the stage of cultivation.

Stage II:- May to July 1952 (3 months)

(1) Visiting the factory for final settlement of accounts.

P.T.O.

~~(2) Attending the factory for final settlement of accounts.~~

(2) Attending to the collection of loans from members issued during thelast season. Taking steps wherever necessary for legal action, such as filing arbitration references and execution petitions for the recovery of the amounts where the amounts could not be recovered in the ordinary course.

(3) Visiting villages for propaganda for improved methods of cultivation, such as deep ploughing by iron ploughs, applying manures, etc. and also inspection of fields to note the stages of cultivation.

(4) Arranging for the registration of cane booked by the societies with the factory by frequently being in contact with the sugar factory and coordinating the work of the factory with that of the societies attached to it.

Stage III -- August to October 1952:- (3 months)

(1) Supervising the work of the fieldmen appointed by the societies and test checking of fields inspected by them and bringing the irregularities, if any, to the notice of the societies and members concerned for rectification then and there.

(2) Checking the accounts of the societies and keeping them up to date duly reconciled.

(3) Watching the agricultural operations during the field inspections and instructing the members regarding implementation of the suggestions offered by the Agricultural Department. To be in close touch with the Agricultural Department and to receive instructions to implement them.

Stage IV -- November 1952 to January 1953 (3 months).

(1) Meeting the factory authorities and arranging for the issue of harvest permits to the members of the societies.

(2) Supervising the weighment of cane brought by the members to the factory at the Hospet India Sugars & Refineries factory.

(3) Collection of weighment tickets and getting them credited in the accounts of the societies.

(4) Inspection of fields and arranging for the drawal of samples of cane by the factory authorities for testing the maturity of the cane to be harvested.

The Senior Inspector requires to be assisted by a Junior Inspector. ~~requires to be assited by a Junior Inspector.~~ The cane crop will be on the fields for about 11 months in a year and to note the stages of cultivation etc., the fields are to ~~note the stages and therefore there is every~~ be inspected at every stage and therefore there is every need for the services of a Junior Inspector for field Inspection. The Senior Inspector can be told off for items of work other than field inspection. In addition, the Senior Inspector will be visiting the India Sugars and Refiners' Factory at Hospet often for various purposes such as supervision of weighment of cane, getting permits and identity tickets, arranging for examination of samples of cane by the factory authorities to see if the cane supplied is fit for cutting, enquiry into complaints by members regarding the monies due to the societies etc. He will also supervise the disbursement of loans to members at the appropriate time and will see to the proper and uptodate maintenance of accounts by all the societies and in other words he will supervise the working of the societies in regard to the raising of sugar-cane crop by the members from the Central Bank loans, their sale to the sugar factory and the realisation of the dues of members through the factory.

P.T.O.

Copy of suggestions offered by the Sugarcane Liaison Officer, Hospet.

IRON IMPLEMENTS.

Propaganda:- The local ryots use wooden ploughs for cultivation which is not useful and economical. The wooden ploughs have to be replaced every season and the ploughing is also very shallow. The earth has to be ploughed to a depth of nine to twelve inches in order to get the inner soil to the surface. Propaganda should be done for the use of iron ploughs which are economical and also give better results by ploughing deeply. So also ridgers for earthing up should be used since they since they are manufactured with the required width for the formation of furrows. Couper No.11 Medium or Couper No. 20 Heavy ploughs may be propagated. Wherever possible tractors can be used. Tractors can be maintained by the societies and supplied to the members on hire. The Agricultural Department has one tractor for hire to the ryots. The charges are as follows:-

Ploughing and ridging	Rs. 10/- per acre.
Hallowing	5/- "

Plantation:- The present system of planting the cane by the ryots is very narrow and very shallow. Cane should be planted in rows with a distance of at least 2½ feet between the rows for proper growth. The furrows in between the rows should be deep and the rows of cane should get a good earthing up. This can be achieved by using Ridge ploughs.

The Societies should call for indents from the members and arrange for the supply of iron ploughs and ridgers and induce the members to use only such implements advocated. It is advisable if the societies issue loans to the members in kind in the shape of iron implements and chemical manures and oil cake instead of gving cash loans.

Application of proper dose of manures:- The sugarcane crop requires manures in proper proportions without which it will be useless to apply manures. Each acre of cane requires about 200 lbs. of nitrogen; 2 cwts. of Ammonium sulphate and ten bags of oil cake. They have to be applied in two doses; and at the time of plantation or within forty days of plantation i.e. the germination period, and the second dose at the time of earthing i.e. 3 months. Besides farmyard and compost manures from twenty to forty cart loads should be applied. The aversion to compost manure among the ryots should be eradicated by proper propaganda pointing out the qualities and efficiency. The Government give subsidy to the ryots who prepare and use compost.

Burning of cane trash in the fields is a common feature among the ryots. By this they are losing a good supply of manure. The cane trash should be deposited in pits or spread on the ground in layers sprinkling cowdung, water for every layer and covered with mud and allowed to decompose and used after four months as a first rate manure for the cane. Sun hemp can be grown along with the cane after the cane has grown to certain length and then sun-hemp cut and spread on the soil. This forms a good green manure and alleviates the shortages in the use of chemical manures.

Drainage:- The drainage in the fields should be effective. The field should not be water-locked. There must be proper supply of water and at right periods and the drainage should be deep. The cane standing should not be allowed to lodge on the ground or slant on the cane besides. After a period groups of cane in each row should be tied up straight by cane leaves.

P.T.O.

18

Harvesting:- The sugarcane crop matures after eleven months of plantation. If it is cut early or late the sucrose contents will be minimised and so the cane loses value. So harvesting should be done at the right time. For this the date of plantation and the recording of the same is very important. It will help the societies as well as the factory for harvesting at the right time and the issue of hargesting permits. Generally - while harvesting nearly ¾ of a foot of cane is left by the ground level and cut. By this the ryot is a loser by two to three tons of cane which will fetch him about Rs. 150/- more. This is beeause the ryots use sickles for cutting the cane. The sickle does not reach the ground level. Instead cane cutting knives and axes should be used. These things may be supplied to the members through the societies.

Seed material:- The general practice among the ryots is to leave certain portion of the field for seed material. The cane so left is about 1½ tons and the ryots are losers to that extent. Instead the tops should be used for seed - material. The seed material requires less of sucrose contents and the tops serve a useful purpose, while they are useless for using for sugar or for jaggery. The germination is cent percent if tops are used. But the ryots complain that they cannot be preserved until the entire cane is hargested. The tops can be cut as and when the cane is harvested and preserved under shade for about a fortnight and then used. Even if the entire land is not prepared for resowing, the tops can be planted in a small stripe of land just as rice crops and then replanted. Or the ryots can borrow from their neighbours the tops when their field is being harvested and the latter's field is ready for sowing. Another complaint is that the permits issued for harvesting by the factory, are very less and if tops are to be for seed material the field should be cleared as soon as possible. For this the above suggestions hold good and besides the Superintendent, Sugarcane Farm is pleased to arrange for the issue of more permits for harvesting if the ryots adopt this method. This will serve as an impetus. The benefits of sowing tops should be explained to the ryots well and see that the ryots adopt this method. By this - method the entire cane grown in the field can be used for value.

Agr

Jaggery:- Obsolete and out-dated methods are used for the manufacture of jaggery in this locality. The ryots use big pans for heating the juice which is not suitable. Juice should be boiled in smaller pans to get the right quantity of heat throughout. Two furnaces can be used one above the other for boiling the juice in smaller pans. This gives scope for the removal of scum which is not at all done even at the risk of losing good price for the jaggery, greater capacity and better quality and it is economic. The pans should be 5¾ feet in diameter and two feet high. The pans should be supplied to the ryots ready made since if sheets are supplied they will again get old method pans. The - Srathic Cooperative Engineering Society, Madras may be consulted in this matter and asked to supply ready made pans demon to the societies. The Agricultural Department is holding demonstrations to the ryots for getting better variety of jaggery and the Cooperative Inspectors can follow and keep in touch with the Agricultural Staff and do propaganda to the members of Societies.

Field inspection:-This is an important item of work. The Inspector must visit the fields of the society members - independetnly and record the date of plantation, manuring earthing, harvesting etc.. and do propaganda to the ryots personally on the lines mentioned. Two Inspectors will be do for looking after about 1000 acres with a staff of field men for inspection of fields.

Dev. (P&D I) Dept.

Sub:- Sugarcane Development - Revival of Sugarcane Growers' Co-operative Societies in Hospet Sugar Factory area - Senior Inspector of Co-operative Societies - Continuance.

Ref:- From the I.C.S.C.No.F.68(6)/46-521 dated 22-1-52.

To A.S.

In G.O.Ms.No.4085 Dev. dated 7-10-1950, the Govt. sanctioned one post of Senior Inspector of Co-operative Societies for work connected with the revival of the Sugarcane Growers' Co-operative Societies in the Hospet Sugar Factory area, 50% of the cost being met from the grant of Rs.5,62,500 made by the I.C.S.C. for the development of Sugarcane Industry in this State. The sanction for the above post expired on 28-10-1951. For the reasons stated on pp.1-3 c.f. G.O.Ms.No. 6367 Dev. dated 31-12-51 the Registrar of Co-operative Societies recommended the continuance of the post of the Senior Inspector and also the employment of one Junior Inspector for a period of one year from the date of employment. The D.A., who was consulted whether the expenditure for the above staff can be met from within the grant made by the I.C.S.C., stated that, consequent on the revival of the four posts of typists for the Liaison Farms and the payment of lease amount at increased rates for the lands required for the Liaison Farms, it will not be possible to meet the extra expenditure from the above mentioned grant. The D.A. has however suggested that the R.C.S. may be asked to put up a scheme for work in co-ordination with cane development staff of the Agrl. Dept. to be placed before the I.C.S.C. for approval. In view of the necessity for the continuance of the Senior Inspector, sanction was accorded, in G.O.Ms.No.6367 Dev. dated 31-12-51 for the continuance of the post of Senior Inspector of Co-operative Societies for a further period of 6 months from 29-10-51 and the R.C.S. asked to submit a scheme as suggested by the D.A. The I.C.S.C. was also asked to sanction the expenditure for the continuance of the Senior Inspector. The I.C.S.C. in its letter on p.1 c.f. has stated that as this Govt. have expressed their inability to meet the expenditure on the staff

from within the grant allotted to this State, it is not in a position to meet any expenditure in connection with the above mentioned scheme from any other source. In this connection it may be stated that though the Five Year Scheme for the Development of Sugarcane Industry in this State was sanctioned in Jan. 1949, it was actually commenced on 15-3-1949. The I.C.S.C. had communicated its decision to co-terminate at one and the same time on 31-3-1953, all the Sugarcane Development Schemes sanctioned by it and requested the State Govts. to so arrange the programme of work proposed in the respective schemes so that the targets may be achieved by 31-3-1953. In view of the shorter period of the Devt. Scheme the D.A. estimated Rs,4,32,841 as the share of the I.C.S.C. as against the sanctioned amount of Rs.5,62,600. The I.C.S.C. was asked whether the balance of Rs.1,29,659 out of the allotment of Rs.5,62,500 will be available for utilisation on schemes for the promotion of Sugarcane Development in this State. In its letter on p.21 c.f. G.O.Ms.No.3209 Dev. dated 16-8-50, the I.C.S.C. informed this Govt. that the question of utilisation of the balance will be considered by the Committee in the light of the results achieved on the expiry of the specified period of working of the scheme. It will therefore be seen that there may be savings from the allotment of Rs.5,62,500 made by the I.C.S.C. out of which the expenditure on the Senior Inspector of Co-operative Societies sanctioned for work relating to the revival of the Sugarcane Growers' Co-operative Societies in Hospet Sugar Factory area, can be met. However a copy of the letter on p.1 c.f. may be sent to the D.A. and he may be asked to examine and report urgently whether it will be possible to meet the expenditure involved in this case from within the grant in view of the revised figures for the Devt. Scheme estimated by him. Subject to orders a draft memo is submitted below for approval.

From the DA No. C.112/52 dated 22.2.52
From the D.A No. D.112/52 dated 28.2.52.

To A.S.

Previous notes on pp.1-2 above may be read. The Rev.Secy. submitted proposals for the continuance for a period of one year from 29-10-1951 of the post of a Senior Inspector of Co-operative Societies sanctioned in G.O.Ms.No.4085 Dev. dated 7-10-1950 and also for the sanction of one post of Junior Inspector of Co-operative Societies for a period of one year from the date of appointment for the work relating to the revival of the sugarcane Growers' Co-operative Societies in Hospet Sugar Factory area. The D.A. was consulted in the first instance whether the expenditure on the above staff can be met from the grant of Rs.5,62,500 sanctioned by the I.C.S.C. to this State for the Sugarcane Devt. Scheme. He stated at first that, on account of the revival of 4 posts of typists for the Sugarcane Liaison Farms and the payment of lease amounts at increased rates for the lands required for the Liaison Farm, it was not possible to meet the expenditure on the staff from within the grant by the I.C.S.C. However sanction was accorded for the continuance of the post of the Senior

Inspector of Co-operative Societies for a further period of 6 months. from 29-10-51 and the R.C.S. was asked to submit a scheme for work in co-ordination with the Sugarcane Devt. staff of the Agrl. Dept. to be placed before the I,C.S.C. including in it provision for the further continuance of the Senior Inspector and also for the appointment of a Junior Inspector. The I.C.S.C. also expressed its inability to meet the expenditure on the above staff from any other source. But the Committee will have no objection to meet the expenditure, if it is within the grant allotted to this State. The D.A. was again asked to report the savings anticipated on the Sugarcane Devt. Scheme in view of the reduced period of working of the scheme so as to co-terminate it with other State Govts. by 31-3-1953. The D.A. has now reported that the anticipated savings from the grant of Rs.5,62,500 for the sugarcane Devt. Scheme sanctioned by the I.C.S.C. will be Rs.8,000 at the end of the scheme. It will therefore be possible to meet the expenditure on account of the continuance of the Senior Inspector of Co-operative Societies and also for the appointment of a Junior Inspector from the savings now anticipated by the D.A. As the present sanction continuing the Senior Inspector for 6 months expires on 28-4-52 and as the R.C.S. has already been asked to submit a scheme for work in co-ordination with the Agrl. staff for Sugarcane Devt. it is for consideration whether the report of the R.C.S. may be awaited till 15-4-52.

In the meanwhile F.& A. and Fin. Depts. may see for perusal.

To A.S.

Action is pending in this file regarding the sanction of the further continuance of the Senior Inspector of Co-operative Societies beyond (1.7.52) and sanction of one post of Junior Inspector for the work relating to the resuscitation of Sugarcane Growers' Co-operative Societies in Hospet. The R.C.S. has submitted a scheme for work in co-ordination with the Sugarcane Development staff of the Agricultural Dept. and the D.A. has been asked to offer his remarks on the scheme. The remarks of the D.A. is awaited. Necessary extracts may be taken from this file for further action and these papers closed as G.O.Ms. No.1611 Dev. dated 14-4-1952.
